Kemmer's laboratory Wesentl' wortlich.

of 2 species were 400 --- 370 (first drawn)
hence

Joh. Rie (Rothschild):

Glutathione 600 : 6000 100 f. t. 1000.

Rothschild's work: 370:

370 : 88.000 = 17 cm

100. 100 = 10 cm. thus 10+ ...

1) Wiederholung of my own observations.
After the denervation of the muscle there is
a permanent change: often this,
2) beginning from the greater or smaller
size of the muscle.

Edm' 10 days: Varying A.P.W.

Wiederholung: metabolism: very slow decrease
of the size of the muscle.

Theorizing: hydrogen & hydride
hydrogen: light & heatless.
