

Unusually large, very high, irregular - mass
of blackish-grey & reddish, to a considerable
size, with a few white spots of the same size

Plutonic rocks are in the center of
the island, surrounded by volcanic rocks
of the same age. The rocks are of the same
age as the rocks of 1839, but the rocks
of the same age as the rocks of 1839
are of the same age as the rocks of 1839

of the same age as the rocks of 1839. The rocks
